

ASSESSMENT

- The Dyslexia Therapist will utilize a variety of informal assessments to help determine students' strengths and weaknesses. This knowledge will be utilized in designing therapeutic interventions according to student needs. The Ekwall/Shanker Reading Inventory(ESRI) will be used to help assist students in developing their reading ability. At times, other informal assessments may also be utilized. Diagnostic Reports displaying the testing results can be purchased.
- Dyslexia Screeners: Dyslexia Screeners may be utilized to identify 'at risk' students who exhibit literacy difficulties, but a CALT cannot diagnose dyslexia without additional training such as licensing as an educational psychologist.
 - * *Connect ~ 2 ~ Learning LLC may be able to offer diagnostic testing for dyslexia in the near future.*
- Students enrolled in *Connect ~ 2 ~ Learning LLC* are NOT required to have a dyslexia diagnosis for receiving services. The strategies utilized during sessions can be beneficial for all learners.

*** INITIAL ASSESSMENTS ARE \$50 FOR AN ASSESSMENT ONE HOUR OR LESS. IN SOME INSTANCES, STUDENTS MAY REQUIRE AN ADDITIONAL SESSION TO COMPLETE ASSESSMENTS, AND AN ADDITIONAL ASSESSMENT FEE WOULD APPLY.**
